VJS CONSTRUCTION SERVICES RECEIVES TWO DAILY REPORTER TOP PROJECTS AWARDS

PEWAUKEE, WI (May 23, 2017) – VJS Construction Services (VJS), a general contracting, construction management, and design build firm located in Pewaukee, was recently recognized with two Top Projects of 2016 Awards from the Daily Reporter. The Top Projects Awards honor those in the industry whose projects met and exceeded expectations in 2016. The projects that received this award included Forest Ridge Elementary School in Oak Creek and Dickson Hollow Senior Housing Campus in Menomonee Falls. Each project had its own unique attributes and challenges, and VJS was proud to be selected as the general contractor for each endeavor.

Forest Ridge Elementary School is an 80,817 square foot two-story elementary school designed to serve 525 students in grades 4K-5 in the Oak Creek-Franklin Joint School District. Forest Ridge was designed in conjunction with a visionary team of individuals consisting of Forest Ridge teachers and district administration. This group worked with the architectural team to inform and shape the way the new school will serve students today and in the future. The school building is organized into “neighborhoods,” grouping similar grade level classrooms around multipurpose, flexible learning spaces for small and large group collaboration.

Dickson Hollow is a 300,000 square foot, 180 unit senior housing facility located in Menomonee Falls. The new facility is comprised of four stories of independent living and three stories of assisted living/memory care. The independent living and assisted/memory care areas are joined together with a two-story Town Center. This new facility allows Menomonee Falls residents to retire in their hometown where they’ve lived and raised their families.

Founded in 1947, VJS Construction Services is one of Wisconsin’s top ten general contractors, construction managers, and design builders. The company specializes in educational facilities, senior living facilities, libraries, sophisticated religious structures, corporate office buildings, manufacturing facilities, and healthcare facilities.
